Introduction

- 1 Finding the Right Tailwheel Instructor**
- 2 The Basics**
- 3 Getting It Started**
- 4 Tailwheel Taxiing**
- 5 High-Speed Taxiing**
- 6 Normal and Soft-Field Takeoffs**
 - Skipping
 - Yaw Fluctuation
 - Takeoff Stall
- 7 Short-Field Takeoffs**
- 8 Tailwheel Aircraft Landings**
 - The Three-Point Landing
 - The Wheel Landing
 - Tail-Low Wheel Landing
- 9 Short-Field and Soft-Field Landings**
 - Short-Field Landing
 - Soft-Field Landing
 - Challenges
- 10 Tailwheel Crosswind Operations**
 - Crosswind Taxiing
 - Crosswind Takeoffs
 - Crosswind Landings
- 11 The Ground Loop**

12 Considering Differences Between Tailwheel Aircraft

Different Types of Tail Wheels

Narrow or Wide Gear, Long or Short Aircraft

Toe or Heel Brakes

Tandem or Side-by-Side Seating

Engines

13 Older Planes

Parts Availability

Mechanic Availability

Insurance

Manuals and Documentation Availability

Benefits of Older Aircraft

14 The Many Modifications of Tailwheel Aircraft

Bigger Engines

Propeller Changes

Short-Field Performance Modifications

Big Tires

Main Gear Modifications

Bungees vs. Spring Steel Gear

Tail Wheel Changes

15 Primary Training and Testing in a Tailwheel Aircraft

16 So You Want To Be a Tailwheel Instructor

17 “General Rules” of Tailwheel Flying

Useful Tailwheel Resources

The Tailwheel Endorsement
